

Sir, being employed as a truck driver and having limited space I have frequently had to transfer movies and music to CD-roms as a space saving technique. However the move by the hollywood cartel is making it difficult for me to enjoy what I purchase when they keep restricting what I can do with what I have purchased. I have found it to be a life saver to place my videos music and books on a laptop (I no longer need a DVD player CD player and TV.) In a semi truck sleeper this space means the world, allowing my to keep my ham radio with me for emergencies (i.e. drunks accidnets and other things that happen on the interstates). Please allow the consumers to drive the market not the C.E.O.'s that have proven they can't be trusted.
